STATEMENT OF NON-GMO STATUS

Diamond V's XPC[™]_{LS} is produced from naturally selected and naturally occurring proprietary single strain yeast, *Saccharomyces cerevisiae*. The yeast in XPC_{LS} has not been genetically modified by in vitro recombinant DNA technology.

XPC_{LS} is manufactured with grains that are not genetically modified and contains no more than 0.9% adventitious or technically unavoidable genetically modified material. Inherently, the wheat and rye grain products, as well as the molasses, are not genetically modified as no modified varieties are currently marketed in the United States. The soybean used in XPC_{LS} is verified (by our suppliers) to be grown using only non-genetically modified seed.

XPC_{LS} is in compliance with EU Regulation ((EC) No 1829/2003).

The Diamond V production facilities are certified to manufacture products from non-GM materials by an independent Good Manufacturing Practice (GMP) inspector.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Kevin Wolter", written over a horizontal line.
